Project History

The Past

- Initial project development began in 2004, announced in 2006 at NOAC, and released on January 1, 2007.

- Fifty eight releases since initial release

- Two major code rewrites

- All 278 lodges across the country are using LodgeMaster

The Past

- No member portal or self-service access
- Silverlight dependencies
- Limited browser support
- No advanced filtering or reporting

The Project Now

The Project Now

- Completely web-based (HTML/JavaScript)
- Redesigned user interface
- Usable in any modern web browser (Desktop, Laptop, Tablet, Phone)
- New offline client and offline functionality
- Rapid development of new features and bug fixes

The Project Now – New Features

- User account management (ArrowID)
- New member and event grids
- New email functionality (HTML Email & Stats)
- New reporting module

Demonstrations
