

OA LodgeMaster Desktop 1.0.0

Released January 1, 2007

We released OALM Desktop was released on January 1, 2007. We're working to convert lodge data as quickly as we can. We're through most of our initial list of 30 lodges and we've made the entire process pretty efficient. Each lodge we convert seems to get faster. Thank you all for your patience as we go through this process!

Our goal for completing the "Transition to LodgeMaster" is by the end of June 2007, meaning we will have all lodges who have currently requested to migrate up-and-running by the end of June.
