

LodgeMaster 4.1 Release & Webinar

OA LodgeMaster Users,

The OA LodgeMaster Team is excited to announce the upcoming release of version 4.1! We fixed a number of bugs and added 4 new features! Included in the Lodge Client version 4.1 release is the 2018 Charter & JTE module plus a new JTE worksheet view report. We have also added an updated vital statistic report that can be run for youth-only numbers. Bug fixes in version 4.1 include fixing a bug when importing BSA audit results, a vital statistic report error, location merge not merging all records, and a dues import bug.

LodgeMaster 4.1 Update Scheduled

On Wednesday, October 3, 2018 the LodgeMaster team will be updating both the online and offline Lodge Client to version 4.1. Users should expect downtime on Wednesday afternoon while we perform the upgrade. We expect the upgrade to take between 90 and 120 minutes. In version 4.1 we have made database changes that require you to re-download the offline database. Please read the Offline Client Update Instructions below if you use the offline Lodge Client.

Offline Client Update Instructions

Offline Lodge Client users will need to sync before running the offline 4.1 installer. You will receive a warning message in the installer reminding you to sync before installing, this is very important, and you should make sure you have synced any changes before upgrading. Once you install and run version 4.1 your local database will be cleared and then update with the new database structure and your lodge data will be downloaded again. Please let all of your users know this important note.
